Building Material Salvage at Fort Jackson

Who: Fort Jackson, a United States Army training center, is searching for interested organizations, companies, or individuals who can utilize reclaimed building materials from eight (8) Army buildings and structures scheduled for deconstruction in the near future.

What: Deconstruction is a process by which a building is taken apart making the materials available for reuse. Fort Jackson is leading the way in (*environmentally friendly*) sustainable practices by hosting its **first deconstruction project meeting** on **July 30, 2005**. This meeting, which is open to the public, will explain how interested parties may partner with the deconstruction contractor to obtain particular building materials. The contractor reserves the right to charge labor costs and fees for the reclaimed materials, depending on the difficulty of removing the material and demand.

When and Where: The meeting will be held on Saturday, July 30, 2005 from 9:00 am to 12:00 noon at the [Fort Jackson Post Conference Room](#), located at 4376 Jackson Boulevard on Fort Jackson in Columbia, SC. At this meeting, the deconstruction process will be explained and you will be able to view the buildings while they are still standing. Reclaimed building materials will **NOT** be available until the Fall of 2005, at the earliest, when deconstruction officially begins.

Directions: All visitors should enter Fort Jackson via Gate 2 at Forest Drive and I-77. Visitors should stay in the right lane at Gate 2. All visitors will be asked to show a valid drivers license, proof of auto insurance and current vehicle registration. Once passed the gate, Forest Drive becomes Strom Thurmond Blvd. Go straight through the first light on Strom Thurmond Blvd. Take a right at the next light onto Jackson Blvd. The Post Conference Room (Building 4376) will be two blocks down Jackson Blvd. on your right.

Building materials available: 2x4s, 2x6s (treated and untreated), 2x8s, 2x10s, 8x8s (treated and untreated), 2x12s, and a variety of large timbers, vinyl siding, wood siding, church pews and podiums, doors and windows, plumbing and electrical equipment, light fixtures, various hardware, etc.

Further Information: Please contact Julie Seel at 803-751-6859 or by email at Julie.Seel@jackson.army.mil. For additional information about the meeting on July 30, 2005, the deconstruction process, and the buildings scheduled for deconstruction, visit our website at:
